MIS Ch 3: Information Systems, Organizations, and Strategy

Q1. Which of the following is a major economic impact of Information Systems on businesses?

A. Higher operating costs

B. Increased productivity and efficiency

C. Reduced competitiveness

D. Reduced access to global markets

Answer: B. Increased productivity and efficiency [1]

Q2. Which of the following is a key economic impact of IT?

A. IT increase the cost of capital

B. IT changes the relative costs of capital and information

C. IT removes the need for information

D. IT eliminates labor as a factor of production

Answer: B. IT changes the relative costs of capital and information [2]

Q3. What does IT help firms reduce?

A. Labor force

B. Product prices

C. Transaction costs

D. Equipment maintenance

Answer: C. Transaction costs [3]

Q4. Which IT-enabled strategy focuses on producing goods and services at a lower cost than competitors?

A. Product differentiation

B. Focus strategy

C. Low-cost leadership

D. Customer intimacy

Answer: C. Low-cost leadership [4]

Q5. When a company uses IT to build strong ties with suppliers (e.g., automated ordering), it is applying which strategy?

A. Switching cost reduction

B. Supplier intimacy

C. Product differentiation

D. Cost reuse strategy

Answer: B. Supplier intimacy [5]

Q6. Which of the following is NOT a primary activity in Porter's value chain?

A. Operations

B. Inbound Logistics

C. Human resource management

D. Marketing & sales

Answer: C. Human resource management [6]

Q7. Which primary activity involves transforming raw materials into finished products?

A. Service

B. Operations

C. Procurement

D. Outbound logistics

Answer: B. Operations [7]

Q8. "Improving processes using R&D and innovation" belongs to which support activity?

A. Infrastructure

B. Technology development

C. Procurement

D. Service

Answer: B. Technology development [8]

Q9. Which of the following is a key management issue in using IT for competitive advantage?

A. Choosing office furniture

B. Aligning IT with business strategy

C. Hiring temporary workers

D. Monitoring employee attendance

Answer: B. Aligning IT with business strategy [9]

Q10. Which statement best describes a Value Web?

A. A simple linear chain of business activities

B. A chain where only suppliers are included

C. A model that ignores digital technologies

D. A network of companies that collaborate to create value

Answer: D. A network of companies that collaborate to create value [10]

MIS Ch 6: Foundations of Business Intelligence

Q1. Which of the following issues is associated with the traditional file environment when handling large volumes of data?

A. Easy data retrieval

B. Data redundancy and inconsistency

C. Fast processing speeds

D. High security

Answer: B. Data redundancy and inconsistency [11]

Q2. Which of the following is NOT a limitation of the traditional file environment?

A. Data redundancy

B. Limited access control

C. Data centralization

D. Inconsistent data updates

Answer: C. Data centralization [12]

Q3. How does using a database impact business operations?

A. By slowing down data processing

B. By eliminating the need for customer feedback

C. By creating data silos between departments

D. By streamlining data management and improving efficiency

Answer: D. By streamlining data management and improving efficiency [13]

Q4. What role do databases play in business analytics?

A. They eliminate the need for data analysis

B. They store historical data, which is used to generate business insights

C. They slow down the analysis of business data

D. They make all business decisions automatically

Answer: B. They store historical data, which is used to generate business insights [14]

Q5. In a traditional file environment, data is organized primarily through:

A. Centralized databases

B. Individual application programs creating separate files

C. A shared relational system

D. Automatic data integration tools

Answer: B. Individual application programs creating separate files [15]

Q6. Which technique belongs to Data Mining?

A. Roll-up

B. Pivot

C. Slice

D. Clustering

Answer: D. Clustering [16]

Q7. Which time focus is correct?

A. OLAP → Future only

B. Data Mining → Past only

C. OLAP → Past and present

Answer: C. OLAP → Past and present [17]

Q8. Which of the following is an example of text data?

A. Sales table

B. Customer reviews

C. Inventory count

D. Financial balance sheet

Answer: B. Customer reviews [18]

Q9. Which type of web mining analyzes user clicks and navigation paths?

A. Web content mining

B. Web structure mining

C. Web usage mining

D. Text mining

Answer: C. Web usage mining [19]

Q10. Which problem is MOST likely without Data Governance?

A. Faster systems

B. Data inconsistency and security risks

C. Better decision-making

D. Reduced costs

Answer: B. Data inconsistency and security risks [20]

MIS Ch 11: Managing Knowledge

Q1. Which of the following BEST describes knowledge?

A. Raw facts

B. Processed data

C. Information combined with experience

D. Numbers only

Answer: C. Information combined with experience [21]

Q2. A major benefit of Managing Knowledge is:

A. Loss of expertise

B. Repeating the same mistakes

C. Faster learning and innovation

D. Increased confusion

Answer: C. Faster learning and innovation [22]

Q3. Sharing best practices through intranet or training belongs to:

A. Knowledge application

B. Knowledge storage

C. Knowledge dissemination

D. Knowledge creation

Answer: C. Knowledge dissemination [23]

Q4. Which sequence correctly represents the KM Value Chain?

A. Store → Share → Acquire → Apply

B. Acquire → Store → Share → Apply

C. Share → Store → Apply → Acquire

D. Apply → Share → Store → Acquire

Answer: B. Acquire → Store → Share → Apply [24]

Q5. Which benefit results from effective KM Value Chain implementation?

A. Knowledge loss

B. Poor decisions

C. Competitive advantage

D. Increased confusion

Answer: C. Competitive advantage [25]

MIS Ch 13: Building Information Systems

Q1. Information Technology mainly enables organizational change by:

A. Slowing communication

B. Increasing paperwork

C. Improving information flow and coordination

D. Reducing data availability

Answer: C. Improving information flow and coordination [26]

Q2. One major impact of IT-enabled structural change is:

A. Slower decision-making

B. Faster and more flexible organizations

C. Increased hierarchy levels

D. Reduced employee responsibility

Answer: B. Faster and more flexible organizations [27]

Q3. Which activity is performed FIRST in system analysis?

A. System design

B. Coding

C. Study of existing system

D. System testing

Answer: C. Study of existing system [28]

Q4. System Design mainly focuses on:

A. What the system should do

B. User training

C. System maintenance

D. How the system will work

Answer: D. How the system will work [29]

Q5. Pilot Conversion is suitable when:

A. The system is small or low risk

B. Immediate full implementation is required

C. Users do not need training

D. System is already perfect

Answer: A. The system is small or low risk [30]

Q6. Which method involves building a working model of the system first?

A. Outsourcing

B. Prototyping

C. SDLC

D. Application package

Answer: B. Prototyping [31]

Q7. A major disadvantage of end-user development is:

A. High cost

B. Strong security

C. Slow development

D. Poor documentation and control

Answer: D. Poor documentation and control [32]

Q8. RAD focuses on quick development using reusable components.

A. True

B. False

Answer: A. True [33]

Q9. The first step in Component-Based Development is:

A. Component integration

B. Component testing

C. Component identification

D. System deployment

Answer: C. Component identification [34]

Q10. Agile development delivers software in:

A. One final release

B. Long sequential phases

C. Short iterations (sprints)

D. Only after full documentation

Answer: C. Short iterations (sprints) [35]

Q11. Which technique is commonly used in JAD sessions?

A. Coding

B. Brainstorming

C. Debugging

D. Deployment

Answer: B. Brainstorming [36]

Chapter 1: Introduction to E-Business and E-Commerce

Q1: Which is a positive impact of electronic communication?

A. Slow response time

B. High printing cost

C. Faster information exchange

D. Limited market access

Answer: C. Faster information exchange

Q2: Which is a negative impact of electronic communication?

A. Global market access

B. Cybersecurity risks

C. Faster communication

D. Cost reduction

Answer: B. Cybersecurity risks

Q3: What is the main focus of E-Commerce?

A. Internal business processes

B. Buying and selling of goods and services online

C. Employee training and development

D. Managing company culture

Answer: B. Buying and selling of goods and services online

Q4: Which statement best describes the difference between E-Commerce and E-Business?

A. E-Commerce is only about selling, E-Business includes buying, selling, and internal operations

B. E-Business is only about selling products, E-Commerce includes business management

C. E-Commerce is offline, E-Business is online

D. There is no difference

Answer: A. E-Commerce is only about selling, E-Business includes buying, selling, and internal operations

Q5: Which perspective emphasizes automating business transactions and workflows to improve efficiency?

A. Online Perspective

B. Communications Perspective

C. Business Process Perspective

D. Service Perspective

Answer: C. Business Process Perspective

Q6: Customer service in e-commerce mainly deals with:

A. Product manufacturing

B. Complaints, returns, and inquiries

C. Warehouse construction

D. Price fixing

Answer: B. Complaints, returns, and inquiries

Q7: Which of the following is a key feature of a transactional e-commerce site?

A. Static web pages only

B. Shopping cart

C. Search engine only

D. Company profile

Answer: B. Shopping cart

Q8: The primary goal of a services-oriented relationship-building website is to:

A. Increase one-time sales

B. Reduce website traffic

C. Improve customer trust and loyalty

D. Eliminate customer interaction

Answer: C. Improve customer trust and loyalty

Q9: Digital marketing helps businesses mainly to:

A. Avoid customers

B. Increase brand awareness and sales

C. Reduce internet usage

D. Stop online interaction

Answer: B. Increase brand awareness and sales

Q10: The main objective of Supply Chain Management is to:

A. Increase production cost

B. Stop information sharing

C. Reduce customer satisfaction

D. Deliver the right product at the right time and cost

Answer: D. Deliver the right product at the right time and cost

Q11: Which driver helps businesses reduce communication and transaction expenses?

A. Global reach

B. Improved customer service

C. Cost reduction

Answer: C. Cost reduction

Q12: Which type of driver refers to advancements in Internet, mobile, and cloud technologies?

A. Economic drivers

B. Technological drivers

C. Social drivers

D. Government drivers

Answer: B. Technological drivers

Q13: Which risk is associated with IT projects failing due to unexpected technical issues?

A. Market risk

B. Operational risk

C. Technical risk

D. Legal risk

Answer: C. Technical risk

Q14: Which of these is considered a human barrier?

A. Set-up cost

B. Reluctance of staff

C. Difficulty integrating IT systems

D. Current bandwidth restrictions

Answer: B. Reluctance of staff

Q15: Which of the following is a key driver for consumers adopting Internet services?

A. High cost of Internet access

B. Perceived usefulness and convenience

C. Limited content

D. Slow network speed

Answer: B. Perceived usefulness and convenience

Chapter 2: Marketplace Analysis for E-Commerce

Q1: Strategic agility refers to an organization's ability to:

A. Reduce employee numbers

B. Respond quickly and effectively to change

C. Increase profits only

D. Avoid competition

Answer: B. Respond quickly and effectively to change

Q2: Which platform is commonly analyzed in online marketplace analysis?

A. Physical warehouses only

B. Factory machines

C. Office buildings

D. Online marketplaces like Amazon or Shopee

Answer: D. Online marketplaces like Amazon or Shopee

Q3: Market trend analysis helps businesses to:

A. Avoid digital investment

B. Predict future opportunities and risks

C. Eliminate competition

D. Reduce customer interaction

Answer: B. Predict future opportunities and risks

Q4: Search intermediaries are best described as:

A. Internal company databases

B. Manufacturing systems

C. Online platforms that help users find and compare information, products, or services

D. Offline retail stores

Answer: C. Online platforms that help users find and compare information, products, or services

Q5: Review and rating platforms influence online marketplaces by:

A. Reducing product variety

B. Affecting consumer trust and purchase decisions

C. Increasing manufacturing costs

D. Limiting customer access

Answer: B. Affecting consumer trust and purchase decisions

Q6: Which of the following is a disadvantage of Disintermediation?

A. Less profit for producers

B. More control over customers

C. Producers must handle more responsibilities

D. Improved customer relationship

Answer: C. Producers must handle more responsibilities

Q7: Which digital service acts as a reintermediary in e-commerce?

A. Manufacturer website

B. Customer review blog

C. Payment gateway

D. Offline warehouse

Answer: C. Payment gateway

Q8: Which of the following is an example of an electronic marketplace?

A. Local street market

B. Shopping mall

C. Online shopping website

D. Wholesale store

Answer: C. Online shopping website

Q9: Amazon and Shopee are examples of:

A. Physical locations

B. Hybrid locations

C. Electronic locations

D. Traditional markets

Answer: C. Electronic locations

Q10: What is the main advantage of buyer-controlled sites for buyers?

A. Higher prices

B. Limited choice

C. Lower prices due to competition

D. Fixed product selection

Answer: C. Lower prices due to competition

Q11: Which element explains why customers should choose a business?

A. Revenue model

B. Value proposition

C. Management team

D. Target market

Answer: B. Value proposition

Q12: What do the key elements of a business model describe?

A. Website color design

B. How a business creates and earns value

C. Internet speed

D. Office location

Answer: B. How a business creates and earns value

Q13: Apple's strong brand loyalty is an example of:

A. Market strategy

B. Revenue model

C. Competitive advantage

D. Value proposition

Answer: C. Competitive advantage

Q14: Which element focuses on internal structure and teams?

A. Value proposition

B. Market strategy

C. Organizational development

D. Target market

Answer: C. Organizational development

Q15: Which of the following is NOT a key element of a business model?

A. Competitive advantage

B. Management team

C. Value proposition

D. Internet bandwidth

Answer: D. Internet bandwidth

Q16: Which of the following best describes a Forward Auction?

A. One buyer competes with many sellers

B. Many buyers compete by increasing prices

C. Prices decrease during bidding

D. Lowest bidder wins

Answer: B. Many buyers compete by increasing prices

Q17: What happens to the price during a Reverse Auction?

A. It increases continuously

B. It remains fixed

C. It decreases as sellers compete

D. It depends on the buyer's bid

Answer: C. It decreases as sellers compete

Q18: Price discovery mainly depends on:

A. Government rules

B. Seller decisions only

C. Fixed pricing policy

D. Demand and supply

Answer: D. Demand and supply

Q19: Which market mechanism ensures that goods go to those who value them most?

A. Distribution mechanism

B. Coordination mechanism

C. Efficient allocation mechanism

Answer: C. Efficient allocation mechanism

Q20: Online auction platforms mainly support which mechanism?

A. Coordination between buyers and sellers

B. Limit customer access

C. Only distribution

D. Price fixing

Answer: A. Coordination between buyers and seller

E-Business Infrastructure Quiz

Q1. Which of the following is a main business benefit of an extranet?

A. Increased paper usage

B. Improved communication with partners

C. Reduced security

D. Limited access to information

Answer: B. Improved communication with partners

Q2. Online shopping carts and ERP systems belong to:

A. System software infrastructure

B. Internet infrastructure

C. Hardware infrastructure

D. Application software infrastructure

Answer: D. Application software infrastructure

Q3. How does an extranet improve customer service?

A. By hiding order information

B. By increasing call center workload

C. By allowing customers to track orders online

D. By limiting customer access

Answer: C. By allowing customers to track orders online

Q4. Cloud computing in e-business infrastructure is primarily used for:

A. Running offline software

B. Providing scalable resources on demand

C. Printing invoices manually

D. Hosting physical office servers only

Answer: B. Providing scalable resources on demand

Q5. Which of the following best describes virtualization in an e-business infrastructure?

A. Creating physical copies of servers

B. Running multiple virtual systems on a single physical server

C. Advertising products online

D. Hiring remote employees

Answer: B. Running multiple virtual systems on a single physical server

---

E-Business Environment and Security Quiz Answers

Q1. Which of the following MOST increases customer trust in e-commerce?

A. High prices

B. Complex website design

C. Secure payment systems

D. Slow delivery

Answer: C. Secure payment systems

Q2. Which factor is influenced by laws and government policies?

A. Social factor

B. Environmental factor

C. Cost factor

D. Technological factor

Answer: B. Environmental factor *(Note: In the PESTEL framework commonly taught in Business Information Systems, "Environmental" often refers to the legal and regulatory environment or macro-environmental policies.)*

Q3. Which method ensures only authorized users can access the system?

A. Public access

B. Authentication

C. Advertising

D. Data duplication

Answer: B. Authentication

E-Business Strategy and Competitive Advantage Quiz Answers

Q1. Developing an e-business strategy requires integration of:

A. Only marketing strategy

B. Only information systems

C. Business, marketing, supply chain and IS strategies

D. Only social media tools

Answer: C. Business, marketing, supply chain and IS strategies

---

Q2. Which of the following helps achieve competitive advantage in e-business?

A. Avoiding innovation

B. Using outdated systems

C. Ignoring customer needs

D. Applying innovative techniques

Answer: D. Applying innovative techniques

Q3. A poorly defined e-business strategy may cause competitive disadvantage because:

A. Digital technologies are optional

B. Competitors can leverage better-aligned digital capabilities

C. Customers avoid online platforms

D. Internal controls become stronger

Answer: B. Competitors can leverage better-aligned digital capabilities

---

Q4. Which is an example of using the right message in marketing?

A. Sending technical product ads to uninterested customers

B. Sending sports shoe ads to sports lovers

C. Sending random advertisements

D. Blocking customer communication

Answer: B. Sending sports shoe ads to sports lovers

Q5. Which of the following is part of communicating the benefits of e-channels?

A. Explaining online shopping is faster and convenient

B. Ignoring customer needs

C. Increasing product prices randomly

D. Closing online portals

Answer: A. Explaining online shopping is faster and convenient

E-Business Strategy and Environment Quiz Answers

Q1. What is the main purpose of a strategy process model?

A. To design website graphics

B. To provide a logical sequence for strategy development

C. To reduce employee salaries

D. To increase hardware cost

Answer: B. To provide a logical sequence for strategy development

---

Q2. Which of the following is part of the macro-environment?

A. Company culture

B. Internal IT system

C. Government taxation policy

D. Staff training

Answer: C. Government taxation policy

Q3. Continuous environmental scanning is important because:

A. Environment never changes

B. External factors change frequently

C. Competitors disappear automatically

D. It reduces employee workload

Answer: B. External factors change frequently

Q4. Analyzing the micro-environment helps a company to:

A. Control global inflation

B. Change national law

C. Control economic recession

D. Understand immediate competitive pressures

Answer: D. Understand immediate competitive pressures

Q5. When performing portfolio analysis, a company should:

A. Focus only on financial resources

B. Assess the current capability of business applications

C. Ignore weaknesses in the existing system

D. Only implement new projects without analysis

Answer: B. Assess the current capability of business applications
